Administrative history / Biographical sketch

Note

Frank Adams was born in Woolwich on 5 November 1930. He was educated at Bedford School and won an Open Scholarship to Trinity College Cambridge in 1949 where he studied mathematics.

Following his graduation he began research at Cambridge, initially under A. S. Besicovitch then under S. Wylie, and received his PhD in 1955. Adams was appointed to a Junior University Lecturership in 1955 and was a Research Fellow at Trinity College Cambridge 1955-58. He spent 1957-58 studying at the University of Chicago and at Princeton as a Commonwealth Fellow.

On his return to Cambridge Adams was appointed Fellow, College Lecturer and Director of Studies in Mathematics at Trinity Hall, posts held until 1962 when he took up a Readership at Manchester University. In 1964 Adams succeeded M. H. A. Newman as Fielden Professor of Pure Mathematics there.

In 1970 Adams returned to Trinity College Cambridge as a Fellow when he was appointed to the Lowndean Chair of Astronomy and Geometry in succession to Sir William Hodge, a position he held until his death in January 1989.

Adams's most important area of research was in homotopy theory. He developed the algebraic system known as the Adams Spectral Sequence and did pioneering work on cohomology operations in K-theory.

In 1965 he introduced the Adams conjecture (now the Adams theorem) into the study of K- theory.

His outstanding achievements in mathematics were recognised by his election to the Fellowship of the Royal Society in 1964 (while still only 34) and the award of the Society's Sylvester Medal in 1982.

Adams was also elected a Foreign Associate of the US National Academy of Sciences and an Honorary Member of the Royal Danish Academy; in 1986 he was awarded an honorary doctorate by the University of Heidelberg.

Scope and content

The collection is particularly noteworthy for its coverage of Adams's lectures, research and incoming correspondence.

Section A, Biographical, is not substantial. It includes a little material of Adams's relating to his own career including three Bedford School notebooks and his PhD thesis, and material assembled by I M James during the preparation of his Royal Society memoir.

Section B, Research, provides extensive documentation of Adams's research from the 1950s until his death. It is presented in an alphabetical sequence arranged by subject title.

Section C, Lectures, is the largest in the collection. Two subsections comprise Adams's lecture notes and other teaching material for courses given at Manchester and Cambridge, and material from conferences and seminars attended by Adams throughout the world including drafts of Adams's contributions and notes of contributions by others. A third subsection consists of Adams's ms notes found in filing cabinet drawers labelled 'Other people's lectures'. It includes notes taken by Adams as an undergraduate at Cambridge in 1949.

Section D, Publications, is very slight. It includes drafts of a few of Adams's scientific papers.

Section E, Correspondence, contains virtually no extended exchanges of correspondence as very few copies of Adams's own letters survive. There is, however, significant correspondence from colleagues such as M F (later Sir Michael) Atiyah, M G Barratt, P J Hilton, I M James and S MacLane, sometimes extending over a period of twenty or thirty years.

Notes

Immediate source of acquisition

The main body of papers were received in March 1990 from the Department of Pure Mathematics and Mathematical Statistics, Cambridge University via Dr C. B. Thomas. These papers are A2-A10, B1-B173, C1-C708, D1-D15, E1-E299.

Additional material assembled during the preparation of the Royal Society memoir of Adams was received from Professor I. M. James in December 1990. These papers are A11-A19.

Another large group of material was donated by the Adams family in 1991. These papers are A20, B174-B394, C709-C742, D16-D108, E300-E319.

Restrictions on access

Some material in the collection may contain personal information about living persons, such as student records; access to certain files is therefore restricted, and has been noted in this catalogue. Please contact the Archivist for further information.

Finding aids

The National Cataloguing Unit for Contemporary Scientists created a finding aid for the main body of papers in 1991, and created a supplemental finding aid for additional material received later in 1991. This accrual to the papers consisted of material added to each section of the original finding aid: A.20, B.174-B.394, C.709-C.742, D.16-D.108, E.300-E.319. This material has not yet been fully added to the online catalogue, but may be seen at the National Archives Discovery site at <https://discovery.nationalarchives.gov.uk/browse/r/h/f100f420-9ccf-4912-8208-9ab0615f389e>.

ADAM/A - Biographical material

Title: Biographical material

Reference code: ADAM/A

Date: 1946-1989 (date of creation)

Scope and content: This section contains material gathered after Adams's death, primarily by I. M. James while working on the memoir for the Royal Society published in 1990. This includes letters from former colleagues and students with descriptions and stories about Adams, and includes a photograph taken of Adams after climbing on top of a sculpture at midnight and the eulogy delivered in Trinity College Chapel by J. P. May at the memorial service in April 1993.

ADAM/B - Research

Title: Research

Reference code: ADAM/B

Date: 1950s-1989 (date of creation)

Scope and content: The material is principally Adams's undated MS drafts, notes and calculations documenting his research from the 1950s until his death. It was found in Adams's own folders with titles inscribed thereon. These titles have been reproduced in the catalogue entries and form the basis for the arrangement of the material in an alphabetical sequence. At the end of this sequence is miscellaneous research material including 'work done' and 'work in progress'. The contents of bulky folders have been subdivided for ease of reference.

Note [generalNote]: Files B174-B394 were received from the Adams family in 1991. This material has not yet been fully added to the online catalogue, but may be seen at the National Archives Discovery site at <https://discovery.nationalarchives.gov.uk/browse/r/h/f100f420-9ccf-4912-8208-9ab0615f389e>.

ADAM/C - Lectures

Title: Lectures

Reference code: ADAM/C

Date: 1949-1986 (date of creation)

Scope and content: Items C. 1 - C.344 consist of lectures etc as part of Adams' role in teaching, These are further subdivided according to subject:

C1-C89 Algebra

C90-C129 Geometry

C130-C143 Homology

C144-C218 Homotopy

C219-C230 K-theory

C241-C248 Lie Groups

C249-C263 Representation Theory

C264-C315 Topology

C316-C344 Miscellaneous

C.345 - C.646 are from conferences and seminars he attended and C.647 - C.708 consist of lectures by others.

Note [generalNote]: Files C709-C742 were received from the Adams family in 1991. This material has not yet been fully added to the online catalogue, but may be seen at the National Archives Discovery site at <https://discovery.nationalarchives.gov.uk/browse/r/h/f100f420-9ccf-4912-8208-9ab0615f389e>.

Restrictions on access: Some items of a more personal nature are presently closed, which may account for gaps in the numbering of materials.

ADAM/E - Correspondence

Title: Correspondence

Reference code: ADAM/E

Date: 1954-1988 (date of creation)

Scope and content: This class contains virtually no extended exchanges of correspondence, as the great majority of letters are incoming, with very few carbons of Adams's replies. The content is essentially mathematical; chiefly requests for Adams's advice or comments on specific problems, reflecting Adams's high standing in his field. Of special interest is the extensive correspondence from M. F. Atiyah, M. G. Barratt, P. J. Hilton, I. M. James, A. Liulevic#ius, S. Mac Lane, and C. W. Wilkerson.

Physical description: 319 files

Note [generalNote]: Files E300 - E319 form part of the supplementary papers received from the Adams family in 1991.

Restrictions on access: Some material in the collection may contain personal information about living persons, such as student records; access to certain files is therefore restricted.
